DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

2. Claims 1 and 4 are rejected under 35 U.S.C. 102(a) as being anticipated by applicants' admitted prior arts of Figs. 1A & 1B.

In claim 1, the applicants' admitted prior arts of Figs. 1A & 1B teaches all claimed features, a transmitter circuit (145) for transmitting a test signal (HVIN) from a programmable input/output pin (115) of a programmable logic device, the transmitter circuit comprising an amplifier (150) having an amplifier control terminal (CTRL), a first supply terminal (VFY) connected to the input/output pin, and a first amplifier output terminal (VFY_S).

In claim 4, the applicants' admitted prior arts of Figs. 1A & 1B further teaches, the transmitter circuit of claim 1, further comprising a transistor (155) having a first current-handling terminal (drain terminal) connected to the input/output pin (115), a second current-handling terminal (source terminal), and a control terminal (gate terminal) connected to the first amplifier output terminal (HV).

3. Claims 2 and 3 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
